

Inside Big Tobacco

NicotineNarc's host Parent Chat with Dr. Victor DeNoble

Dr. Victor DeNoble worked for Phillip-Morris in an “undercover” lab and studied the effects of nicotine on the brain. He was fired and his lab was seized when the company realized that his research would prove that nicotine was addictive. Come learn about more of the tobacco industry’s dirty little secrets.

WHEN: Wednesday, April 30th, 2008
